EXAMINER'S AMENDMENT

10. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronni S. Jillions (Reg. No. 31,979) on 6/14/2006 to place the claimed subject matters in the condition for allowance.

The application has been amended as follows:

In the Claims:

Claim 9 is cancelled.

Claims 1, and 37 – 38 are amended.

Claim 1 (Currently Amended):

At line 7, change

“covers a predefined property;”

to:

-- covers a predefined property, wherein defining the coverage criteria comprises selecting a coverage model from at least one of processing node coverage, terminal coverage, connection coverage, path coverage, one or more nodes coverage, statement coverage, multiple condition coverage, exception coverage, external resources coverage, and message content coverage;--

Claim 9 (Cancelled)

Claim 37 (Currently Amended):

At line 7, change

“predefined property,”

to

-- predefined property, wherein the defined coverage criteria comprises selecting a coverage model from at least one of processing node coverage, terminal coverage, connection coverage, path coverage, one or more nodes coverage, statement coverage, multiple condition coverage, exception coverage, external resources coverage, and message content coverage, --

Claim 38 (Currently Amended):

At line 4, change

“elements, comprising a computer-readable medium having”

To

-- elements, comprising a computer-storage medium having --

At lines 9, change

“predefined property,”

to

“predefined property, wherein the defined coverage criteria comprises selecting a coverage model from at least one of processing node coverage, terminal coverage, connection coverage, path coverage, one or more nodes coverage, statement coverage, multiple condition coverage, exception coverage, external resources coverage, and message content coverage,”

-- END --

REASONS FOR ALLOWANCE

11. The following is an examiner's statement of reasons for allowance:

The cited prior arts taken alone or in combination fail to teach, in combination with the other claimed limitations of a method for assessing adequacy of a message-flow test suite for testing a message flow through a set of message flow elements, the method comprising: defining coverage criteria providing numerical evaluations of an extent to which the message-flow test suite covers a predefined property; wherein defining the coverage criteria comprises selecting a coverage model from at least one of processing node coverage, terminal coverage, connection coverage, path coverage, one or more nodes coverage, statement coverage, multiple condition coverage, exception coverage, external resources coverage, and message content coverage; determining a numerical message-flow-coverage-goal for the message flow with respect to the coverage criteria; applying the message-flow test suite to the message flow, while evaluating the coverage criteria so as to generate a numerical coverage result for the set of message flow elements; and comparing the numerical coverage result with numerical message-flow-coverage-goal, so as to evaluate the adequacy of the message-flow test suite as recited in independent claims 1, and 37 – 38.

The closest cited prior arts, the combination of Alur et al. (US 6,516,306 B1), Schwabe et al. (US 6,848,111 B1), and Klein et al. (US 5,499,364 A), teaches a method for assessing adequacy of message flow testing. However, the combination of of Alur et al. (US 6,516,306 B1), Schwabe et al. (US 6,848,111

B1), Klein et al. (US 5,499,364 A) fails to teach "defining coverage criteria providing numerical evaluations of an extent to which the message-flow test suite covers a predefined property; wherein defining the coverage criteria comprises selecting a coverage model from at least one of processing node coverage, terminal coverage, connection coverage, path coverage, one or more nodes coverage, statement coverage, multiple condition coverage, exception coverage, external resources coverage, and message content coverage; determining a numerical message-flow-coverage-goal for the message flow with respect to the coverage criteria; applying the message-flow test suite to the message flow, while evaluating the coverage criteria so as to generate a numerical coverage result for the set of message flow elements; and comparing the numerical coverage result with numerical message-flow-coverage-goal, so as to evaluate the adequacy of the message-flow test suite" as recited in independent claims 1, and 37 – 38, also as pointed out in the applicant's remarks on pages 15 – 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
